

AJAY RAM

Data Analyst | Python | SQL | Power BI | Excel

ramahir9444@gmail.com | +91-9974483435 | Ahmedabad, Gujarat, India | Immediate Joiner

CAREER OBJECTIVE

Motivated B.Tech graduate in Artificial Intelligence & Machine Learning seeking a Data Analyst role at The Batraa Numerology. Proficient in Python, SQL, Power BI, and Excel with hands-on experience building analytical dashboards, data pipelines, and ML-powered insights. Passionate about transforming raw data into actionable business decisions and contributing to data-driven growth.

TECHNICAL SKILLS

Data Analysis	Python (Pandas, NumPy), SQL, Microsoft Excel (Advanced), Google Sheets
Visualization	Power BI, Matplotlib, Seaborn, Dashboard Design, KPI Reporting
Database / SQL	SQL Queries, Data Extraction, Data Cleaning, Database Management
Machine Learning	Scikit-learn, TensorFlow, Regression, Classification, NLP, Model Evaluation
Reporting	Business Reports, Stakeholder Presentations, Actionable Insights, Trend Analysis
Tools	Jupyter Notebook, VS Code, Git, MS Excel, Google Sheets, Flask

DATA ANALYTICS PROJECTS

Student Performance Analysis | Tech: Python, Pandas, Matplotlib, Seaborn, Jupyter Notebook

- Conducted end-to-end exploratory data analysis (EDA) on student exam scores dataset to uncover key performance drivers and trends.
- Cleaned and preprocessed raw data using Pandas — handled missing values, outliers, and feature engineering.
- Designed and built 10+ visualisations using Matplotlib and Seaborn including heatmaps, box plots, and distribution charts to communicate patterns to non-technical stakeholders.
- Identified top 3 factors influencing student performance and documented data-driven recommendations.
- Dataset: Students Performance in Exams — Kaggle.

House Price Prediction — Regression Analysis | Tech: Python, Pandas, Scikit-learn, Linear Regression, Random Forest

- Built a machine learning regression model to predict house prices based on features including area, location, bedrooms, and amenities.
- Applied Linear Regression and Random Forest models; selected best model based on RMSE and R^2 evaluation metrics.
- Performed feature selection and data preprocessing to improve model accuracy by 18%.
- Documented findings in a structured report with visualised predictions vs actuals.
- Dataset: House Prices Dataset — Kaggle.

Sentiment Analysis — NLP & Data Pipeline | Tech: Python, Scikit-learn, NLP, TF-IDF, Flask

- Designed and trained an NLP-based sentiment classification model on 50,000+ IMDB movie reviews using Scikit-learn and TF-IDF vectorisation.
- Achieved 87% classification accuracy on test data after hyperparameter tuning.
- Built a Flask REST API to serve real-time predictions — enabling integration with downstream reporting tools.
- Demonstrated ability to handle large text datasets, feature extraction, and model deployment — directly applicable to business intelligence workflows.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning

LJ University, Ahmedabad, Gujarat

2022 – 2026

CERTIFICATIONS

- Python for Data Science
- Machine Learning Fundamentals
- SQL Basics for Data Analysis

WHY I'M A STRONG FIT FOR THIS ROLE

Requirement

Power BI & Tableau
Advanced Excel & Google Sheets
SQL & Database Management
Python for Analysis & Automation
Dashboards & Insights

My Strength

Power BI — project dashboards built
Advanced Excel listed as core skill
SQL for data extraction & analysis
Python — Pandas, NumPy, automation
Built 10+ charts & EDA reports
